Thin Solid Films 324 (1998) 312–315

thin solid films

Subject Index of Volume 324

Adhesion
Behavior of radio frequency PACVD bilayers (SiC/TiN) on steel, 141
Adsorption
Molecular packing of HSA, IgG, and fibrinogen adsorbed on silicon by AFM imaging, 257
AlCrN film
Protective AlCrN film for organic photoconductors, 180
Aluminium
Magnetron sputtering of aluminium using oxygen or nitrogen as reactive gas, 19
Aluminium oxide
Study of pillar microstructure formation with anodic oxides, 1
Aluminum oxide substrates
Interdiffusion studies of Cr_2O_3 layers on ceramic Al_2O_3 substrates, 165
Anodic oxidation
Study of pillar microstructure formation with anodic oxides, 1
Antimony trisulfide thin films
Substrate temperature effect on the optical and electrical properties of antimony trisulfide thin films, 300
Arachidic acid
Europium and terbium carboxylate interactions in monolayers and Langmuir–Blodgett films, 245
Artificial receptive field
Image edge detecting by using the bacteriorhodopsin-based artificial ganglion cell receptive field, 281
Asymmetrical phthalocyanine
Gas sensing properties of asymmetrically substituted phthalocyanines bearing one crown ether ring, 277
Atomic force microscopy
Effect of Cu-doping on the morphology of ZnTe films electrodeposited from nonaqueous bath, 78
Atomic force microscopy (AFM)
Structural characterization of thin epitaxial Fe films, 129
Molecular packing of HSA, IgG, and fibrinogen adsorbed on silicon by AFM imaging, 257

Bacteriorhodopsin film
Image edge detecting by using the bacteriorhodopsin-based artificial ganglion cell receptive field, 281
Bulk diffusion
Interdiffusion studies of Cr_2O_3 layers on ceramic Al_2O_3 substrates, 165

Carrier gas
Low temperature synthesis of $PbTiO_3$ thin films by MOCVD without carrier gas, 94
Ceramic
Ab initio study of thin metallic and ceramic films, 198
Ceramics
High resolution chemical mapping in the energy-filtering TEM: application to interface layers in ceramics, 170
Cerium
Pure and doped CeO_2 thin films prepared by MOCVD process, 89
Characterization
$CuInSe_2$ thin films grown by MOCVD: characterization, first devices, 115
Chemical mapping
High resolution chemical mapping in the energy-filtering TEM: application to interface layers in ceramics, 170
Chemical vapor deposition
Phase control of Mo_xN films via chemical vapor deposition, 30
Chromium fluoride
Water-induced degradation of chromium fluoride films, 292
Close-spaced vapor transport
Formation reactions of PbTe thin film deposition by close-spaced vapor transport (CSVT) technique, 25
Coatings
Magnetron sputtering of aluminium using oxygen or nitrogen as reactive gas, 19
Cr_2O_3 layers
Interdiffusion studies of Cr_2O_3 layers on ceramic Al_2O_3 substrates, 165
Crown ether
Gas sensing properties of asymmetrically substituted phthalocyanines bearing one crown ether ring, 277
$CuInSe_2$ thin films
$CuInSe_2$ thin films grown by MOCVD: characterization, first devices, 115
CuO
A study of the CuO phase formation during thin film deposition by molecular beam epitaxy, 37

Dark conductivity
Dark conductivity in the x and alpha polymorphs of lithium phthalocyanine, 68
Deposition
Deposition of multiphase molybdate thin films by reactive sputtering, 52
Ab initio study of thin metallic and ceramic films, 198
Deposition rate
The effects of deposition rate and substrate temperature of ITO thin films on electrical and optical properties, 214
Diamond
Optical effects in carbon-ion irradiated diamond, 11
Diffraction
Physical and structural characterization of tungsten oxide thin films for NO gas detection, 44
Diffraction line profile
Microhardness evaluation of Cu–Ni multilayered films by X-ray diffraction line profile analysis, 162
Dihydride surface
Role of energetic flux in low temperature Si epitaxy on dihydride-terminated Si (001), 85

Elsevier Science S.A.
PII S0040-6090(98)00836-0

Dislocation density
Microhardness evaluation of Cu–Ni multilayered films by X-ray diffraction line profile analysis, 162
Dislocation distribution
Microhardness evaluation of Cu–Ni multilayered films by X-ray diffraction line profile analysis, 162

Electrical noise
Noise, bolometric performance and aging of thin high T_c superconducting films on silicon membranes, 230
Electrical properties and measurement
The response mechanism of aminotri-*tert*-butylphthalocyanine thin films to nitrogen dioxide, 285
Electrodeposition
Effect of Cu-doping on the morphology of ZnTe films electrodeposited from nonaqueous bath, 78
Electronic devices
Investigation of GaAs-based heterostructure–emitter bipolar transistors (HEBTs), 219
Electron microscopy
Physical and structural characterization of tungsten oxide thin films for NO gas detection, 44
Electrophotographic properties
Protective AlCrN film for organic photoconductors, 180
Electroreflective spectrum
Steady-state photovoltaic and electroreflective spectra in Al/vanadyl phthalocyanine (VOPc, in phase II)/indium–tin–oxide (ITO) sandwich cell, 209
Ellipsometry
Molecular packing of HSA, IgG, and fibrinogen adsorbed on silicon by AFM imaging, 257
Energetic flux
Role of energetic flux in low temperature Si epitaxy on dihydride-terminated Si (001), 85
Epitaxial thicknesses
Role of energetic flux in low temperature Si epitaxy on dihydride-terminated Si (001), 85
Epitaxy
Supersonic jet epitaxy of single crystalline cubic SiC thin films on Si substrates from *t*-Butyldimethylsilane, 124
Europium and terbium ions
Europium and terbium carboxylate interactions in monolayers and Langmuir–Blodgett films, 245

Ferroelectric behavior
Low temperature synthesis of $PbTiO_3$ thin films by MOCVD without carrier gas, 94
Ferromagnetic multilayers
The role of interface anisotropy in spin wave resonance spectra of magnetic multilayers exchange coupled through nonmagnetic f.c.c. spacer, 225
Films
Investigation of inhomogeneity of $BaTiO_3$ thin films using transmittance spectra measurements, 305
Formation reactions
Formation reactions of PbTe thin film deposition by close-spaced vapor transport (CSVT) technique, 25
Fourier transform infrared spectroscopy (FTIR)
Optical effects in carbon-ion irradiated diamond, 11

Gallium arsenide
Investigation of GaAs-based heterostructure–emitter bipolar transistors (HEBTs), 219
Gas sensing
The gas response behavior of spin-coated phthalocyanine films to NO_2, 274
Gas sensing properties of asymmetrically substituted phthalocyanines bearing one crown ether ring, 277
Growth mechanism
Study of pillar microstructure formation with anodic oxides, 1

Heterostructures
Investigation of GaAs-based heterostructure–emitter bipolar transistors (HEBTs), 219
High resolution X-ray diffraction
Biaxial strain in $Al_xGa_{1-x}N$/GaN layers deposited on 6H-SiC, 107

Image processing
Image edge detecting by using the bacteriorhodopsin-based artificial ganglion cell receptive field, 281
Image-spectrum electron energy-loss spectroscopy
High resolution chemical mapping in the energy-filtering TEM: application to interface layers in ceramics, 170
Indium Tin Oxide
The effects of deposition rate and substrate temperature of ITO thin films on electrical and optical properties, 214
Infrared spectroscopy
Optical effects in carbon-ion irradiated diamond, 11
Inhomogeneity
Investigation of inhomogeneity of $BaTiO_3$ thin films using transmittance spectra measurements, 305
In-plane components
Biaxial strain in $Al_xGa_{1-x}N$/GaN layers deposited on 6H-SiC, 107
In situ X-ray monitoring
In situ X-ray investigations of thin film growth, 63
Interface anisotropy
The role of interface anisotropy in spin wave resonance spectra of magnetic multilayers exchange coupled through nonmagnetic f.c.c. spacer, 225
Interfacial layer
The effects of in-situ pretreatments of the substrate surface on the properties of PLZT films fabricated by a multi-target sputtering method, 101
Ion bombardment
Optical effects in carbon-ion irradiated diamond, 11
Ion implantation
Tungsten doping into vanadium dioxide thermochromic films by high-energy ion implantation and thermal annealing, 151

Langmuir Blodgett films
Organization of polymer-capped platinum colloidal particles at the air–water interface, 239
Langmuir–Blodgett films
Europium and terbium carboxylate interactions in monolayers and Langmuir–Blodgett films, 245
LB film
Gas sensing properties of asymmetrically substituted phthalocyanines bearing one crown ether ring, 277
Lithium phthalocyanine
Dark conductivity in the *x* and alpha polymorphs of lithium phthalocyanine, 68
Low temperature synthesis
Low temperature synthesis of $PbTiO_3$ thin films by MOCVD without carrier gas, 94
Luminescent films
Europium and terbium carboxylate interactions in monolayers and Langmuir–Blodgett films, 245

Magnetron sputtering
In situ X-ray investigations of thin film growth, 63
Membranes
Noise, bolometric performance and aging of thin high T_c superconducting films on silicon membranes, 230
Metallic
Ab initio study of thin metallic and ceramic films, 198

Microhardness
Microhardness evaluation of Cu–Ni multilayered films by X-ray diffraction line profile analysis, 162
Protective AlCrN film for organic photoconductors, 180
MOCVD
$CuInSe_2$ thin films grown by MOCVD; characterization, first devices, 115
Mo_xN films
Phase control of Mo_xN films via chemical vapor deposition, 30
Molecular beam epitaxy
A study of the CuO phase formation during thin film deposition by molecular beam epitaxy, 37
Molybdate thin films
Deposition of multiphase molybdate thin films by reactive sputtering, 52
Monolayers
Organization of polymer-capped platinum colloidal particles at the air–water interface, 239
Multilayered films
Microhardness evaluation of Cu–Ni multilayered films by X-ray diffraction line profile analysis, 162

NaCl substrates
Complementary STM and TEM investigations of thin Pd-films, 176
Nitrogen
Magnetron sputtering of aluminium using oxygen or nitrogen as reactive gas, 19
Nitrogen dioxide
The response mechanism of aminotri-*tert*-butylphthalocyanine thin films to nitrogen dioxide, 285

Optical properties
Structural and optical properties of $Sr_{1-x}Ba_xTiO_3$ thin films prepared by rf sputtering, 134
Infrared transmission spectra of thin GaS films, 159
Opto-electronics
The effects of deposition rate and substrate temperature of ITO thin films on electrical and optical properties, 214
Organic photoconductors
Protective AlCrN film for organic photoconductors, 180
Organic substances
The response mechanism of aminotri-*tert*-butylphthalocyanine thin films to nitrogen dioxide, 285
Organometallic vapor deposition
Pure and doped CeO_2 thin films prepared by MOCVD process, 89
Organometallic vapour deposition
Supersonic jet epitaxy of single crystalline cubic SiC thin films on Si substrates from *t*-Butyldimethylsilane, 124
Oscillatory exchange coupling
The role of interface anisotropy in spin wave resonance spectra of magnetic multilayers exchange coupled through nonmagnetic f.c.c. spacer, 225
Oxides
Pure and doped CeO_2 thin films prepared by MOCVD process, 89

PbTe thin film deposition
Formation reactions of PbTe thin film deposition by close-spaced vapor transport (CSVT) technique, 25
Perovskite
Low temperature synthesis of $PbTiO_3$ thin films by MOCVD without carrier gas, 94
Phase control
Phase control of Mo_xN films via chemical vapor deposition, 30
Photovoltage
Steady-state photovoltaic and electroreflective spectra in Al/vanadyl phthalocyanine (VOPc, in phase II)/indium–tin–oxide (ITO) sandwich cell, 209
Phthalocyanine
The gas response behavior of spin-coated phthalocyanine films to NO_2, 274
Plasma processing and deposition
Behavior of radio frequency PACVD bilayers (SiC/TiN) on steel, 141
Platinum
Organization of polymer-capped platinum colloidal particles at the air–water interface, 239
PLZT film
The effects of in-situ pretreatments of the substrate surface on the properties of PLZT films fabricated by a multi-target sputtering method, 101
Polymorphs
Dark conductivity in the *x* and alpha polymorphs of lithium phthalocyanine, 68
Pretreatment
The effects of in-situ pretreatments of the substrate surface on the properties of PLZT films fabricated by a multi-target sputtering method, 101
Pseudoelasticity
Deformation behaviour associated with the stress-induced martensitic transformation in Ti–Ni thin films and their thermodynamical modelling, 184

Reactive sputtering
Deposition of multiphase molybdate thin films by reactive sputtering, 52
Reciprocal lattice vector
Biaxial strain in $Al_xGa_{1-x}N$/GaN layers deposited on 6H-SiC, 107
Reflectance
The effects of deposition rate and substrate temperature of ITO thin films on electrical and optical properties, 214
Refractive index
Investigation of inhomogeneity of $BaTiO_3$ thin films using transmittance spectra measurements, 305
Resistivity
The effects of deposition rate and substrate temperature of ITO thin films on electrical and optical properties, 214
Rf-plasma-enhanced chemical vapour deposition
In situ X-ray investigations of thin film growth, 63
Rutherford backscattering and channeling spectrometry (RBS-C)
Structural characterization of thin epitaxial Fe films, 129
Rutherford backscattering spectroscopy
Water-induced degradation of chromium fluoride films, 292

Semiconductors
Infrared transmission spectra of thin GaS films, 159
Investigation of GaAs-based heterostructure–emitter bipolar transistors (HEBTs), 219
Sensors
The response mechanism of aminotri-*tert*-butylphthalocyanine thin films to nitrogen dioxide, 285
Shape memory alloy
Deformation behaviour associated with the stress-induced martensitic transformation in Ti–Ni thin films and their thermodynamical modelling, 184
Si
Role of energetic flux in low temperature Si epitaxy on dihydride-terminated Si (001), 85
Silicon
Supersonic jet epitaxy of single crystalline cubic SiC thin films on Si substrates from *t*-Butyldimethylsilane, 124
Silicon carbide
Supersonic jet epitaxy of single crystalline cubic SiC thin films on Si substrates from *t*-Butyldimethylsilane, 124
Behavior of radio frequency PACVD bilayers (SiC/TiN) on steel, 141

Silicon oxide
Molecular packing of HSA, IgG, and fibrinogen adsorbed on silicon by AFM imaging, 257
Spacer thickness
The role of interface anisotropy in spin wave resonance spectra of magnetic multilayers exchange coupled through nonmagnetic f.c.c. spacer, 225
Spin-coated film
The gas response behavior of spin-coated phthalocyanine films to NO_2, 274
Gas sensing properties of asymmetrically substituted phthalocyanines bearing one crown ether ring, 277
Spin wave resonance (SWR)
The role of interface anisotropy in spin wave resonance spectra of magnetic multilayers exchange coupled through nonmagnetic f.c.c. spacer, 225
Sputtering
Magnetron sputtering of aluminium using oxygen or nitrogen as reactive gas, 19
Physical and structural characterization of tungsten oxide thin films for NO gas detection, 44
The effects of in-situ pretreatments of the substrate surface on the properties of PLZT films fabricated by a multi-target sputtering method, 101
STM and TEM investigations
Complementary STM and TEM investigations of thin Pd-films, 176
Strontium barium titanate
Structural and optical properties of $Sr_{1-x}Ba_xTiO_3$ thin films prepared by rf sputtering, 134
Structural properties
Structural and optical properties of $Sr_{1-x}Ba_xTiO_3$ thin films prepared by rf sputtering, 134
Substrate temperature
The effects of deposition rate and substrate temperature of ITO thin films on electrical and optical properties, 214
Substrate temperature effect on the optical and electrical properties of antimony trisulfide thin films, 300
Sulphides
Infrared transmission spectra of thin GaS films, 159
Superconductivity
Noise, bolometric performance and aging of thin high T_c superconducting films on silicon membranes, 230
Surface phonons and adsorbate vibrations
Infrared transmission spectra of thin GaS films, 159

Tantalum
Study of pillar microstructure formation with anodic oxides, 1
Tetraethyl lead
Low temperature synthesis of $PbTiO_3$ thin films by MOCVD without carrier gas, 94
Thermal vacuum evaporation
Substrate temperature effect on the optical and electrical properties of antimony trisulfide thin films, 300
Thermochromic
Tungsten doping into vanadium dioxide thermochromic films by high-energy ion implantation and thermal annealing, 151
Thermodynamical modelling
Deformation behaviour associated with the stress-induced martensitic transformation in Ti–Ni thin films and their thermodynamical modelling, 184
Thin Fe films
Structural characterization of thin epitaxial Fe films, 129
Thin film deposition
A study of the CuO phase formation during thin film deposition by molecular beam epitaxy, 37
Thin films
Structural and optical properties of $Sr_{1-x}Ba_xTiO_3$ thin films prepared by rf sputtering, 134
Tungsten doping into vanadium dioxide thermochromic films by high-energy ion implantation and thermal annealing, 151
Thin Pd-films
Complementary STM and TEM investigations of thin Pd-films, 176
Ti–Ni thin films
Deformation behaviour associated with the stress-induced martensitic transformation in Ti–Ni thin films and their thermodynamical modelling, 184
Titanium nitride
Behavior of radio frequency PACVD bilayers (SiC/TiN) on steel, 141
Transfer matrix approach
The role of interface anisotropy in spin wave resonance spectra of magnetic multilayers exchange coupled through nonmagnetic f.c.c. spacer, 225
Transition edge bolometer
Noise, bolometric performance and aging of thin high T_c superconducting films on silicon membranes, 230
Transmittance
The effects of deposition rate and substrate temperature of ITO thin films on electrical and optical properties, 214
Tribological properties
The tribological behavior of type II textured MX_2 (M = Mo, W; X = S, Se) films, 190
Tungsten doping
Tungsten doping into vanadium dioxide thermochromic films by high-energy ion implantation and thermal annealing, 151
Type II textured MX_2 films
The tribological behavior of type II textured MX_2 (M = Mo, W; X = S, Se) films, 190

Vanadium dioxide
Tungsten doping into vanadium dioxide thermochromic films by high-energy ion implantation and thermal annealing, 151
Vanadyl phthalocyanine film
Steady-state photovoltaic and electroreflective spectra in Al/vanadyl phthalocyanine (VOPc, in phase II)/indium–tin–oxide (ITO) sandwich cell, 209
Visual simulation
Image edge detecting by using the bacteriorhodopsin-based artificial ganglion cell receptive field, 281

Wear experiment
The tribological behavior of type II textured MX_2 (M = Mo, W; X = S, Se) films, 190

X-ray photoelectron spectroscopy (XPS)
Organization of polymer-capped platinum colloidal particles at the air–water interface, 239
X-ray diffraction
Effect of Cu-doping on the morphology of ZnTe films electrodeposited from nonaqueous bath, 78
X-ray photoelectron spectroscopy
Water-induced degradation of chromium fluoride films, 292
X-ray diffraction (XRD)
Structural characterization of thin epitaxial Fe films, 129

Yttrium
Pure and doped CeO_2 thin films prepared by MOCVD process, 89
